

Applications of Galois Theory

Presenter:

Mr. Sandesh Thakuri

Roll No: 43

Supervisor:

Assoc. Prof. Tulasi Prasad Nepal.

1 Introduction

1. Field Extension

A field E is said to be an extension field of a field F denoted by E/F , if F can be embedded in E .

2. Galois Field Extension

The field E of F is said to be the Galois extension if E is normal extension of F

3. Galois Group

Let E/F . Then the set of all automorphisms of E that fixes F , denoted by $\text{Aut}(E/F)$ forms a group under the function composition. This group is called the Galois Group
